Comments: My recommendation would be to allow Class 1 e mtb's on the trails (pedal assist up to 20 mph). The e mtb trend will continue and the benefits of getting more people on bikes in the forest is a positive. Please do not allow Class 2 (throttle) on the single track trails. Plenty of atv trails for those users (which I believe is limited). An ebike will probably be in my future as I age and can't make it up the hills but still want to experience the trails and forest.
