Comments: I would like to comment on the idea of allowing e-bikes on non-motorized trails. E-bike are a motorized vehicle and there should not be a blanket change to FS rules and definitions that would classify them as otherwise. However, some trails should be allowed by virtue of the direct land managers that oversee them along with public input, to allow class 1 e-bikes on a case by case basis if it's determined that e-bike use on a specific trail will not affect the other non-motorized users in a negative manner.
