Title:

Comments: Class 1 ebikes should be allowed on all trails where regular mountain bikes are allowed. This will allow access to many more users for a variety of reasons and my experience riding a class 1 ebike is that they have no greater impact on the trails than a non ebike. Trail conflicts are based on the individual user.....a safe and courteous biker will be so on a regular or ebike whereas an unsafe or selfish rider will do so regardless of the type of bike one rides.
