Title:

Comments: I do not support electric vehicles in forest service land. I have been riding mountain bikes for 25 years. I have ridden, built and repaired many, many trails in so many locations around the country. I did not do this to support motorized vehicles but bicycles. The joy of riding a bicycle under one's own power is simply wonderful. To have motor powered machines of any kind on the trails takes away what makes mountain bike rewarding, self powered freedom. Everywhere in our lives we have machines. Let's keep them out of the back country. I do not support electric vehicles in forest service land. Thank you, Robert
