Title:

Comments: Class 1 e bikes should be allowed on trails that allow mountain bikes. These e bikes require the rider to use the pedals just like a regular bike but provide assistance to the rider. For some older riders, this assistance is the difference between an enjoyable experience and not wanting to use the trails at all. Many riders on regular bikes will go faster than the 20 mph max assisted speed the class 1 e bikes can go. Please allow these e bikes on the bike trails so that those that want to get in the back woods can do so!
