Comments: To whom it may concern,

Please keep our NFS trails free of all motorized vehicle travel-including all classes of eMTN bikes. The mountain biking community has worked tirelessly for decades to build and maintain relationships with the hiking and equestrian user groups who we share these trails with. Access by any kind of motorized vehicle opens the cycling community to a new avenue of criticism and potential censure from our existing and future trails.

I ask, as a member of the non-assisted cycling community and a hiker/trail runner that NFS makes all efforts to maintain our trails as strictly non-motorized.

Thank you,

Trinidad J. Mendez
