Comments: Hello, While I do think there is a place for eBikes in Forest Service land. I am in agreement that there need to be limitations on the type, size, weight, and power. eBikes have helped many get outside and on to trails that they would not have been able to experience otherwise, due to the distance or difficulty of the trail. I am NOT an eBike user, but I think about the fact that at some point in my life I will no longer be able to ride at a level that would provide me the opportunity to enjoy the places I love so much. An eBike would allow this opportunity. I am not for allowing eBikes that are so powerful that they destroy trails in the same way we see fossil fuel vehicles root up rocks and dirt on trails.
