Comments: Thanks for taking public comments on this matter. For the record, I am a mountain biker and hiker. At some point, I might be an e-biker due to physical limitations.

There's a time and place for everything. Some trails should be hiker only. Some trails should allow mountain biking. And some trails should allow class 1 e-bikes.

Class 2 & 3 e-bike should not be allowed on these types of trails. They are more suited for trails that motorized vehicles are allowed (like motorcycles).

I realize this brings more management type issues but it's one that can be handled. The world is getting a little more complex and we must adapt to it.

In the past, the mountain bike community has been responsible to developing and maintaining new & existing trails on local, state and federal lands. They have done a great service and I see that trend will continue with all the efforts they continue to do. The funding that comes from these groups could possibly be impacted if e-bikes are allowed on ALL trails.

Thank you for allowing mountain bikes to comment on these important matters.
