Comments: Thanks for taking public comments on this matter. For the record, I am a mountain biker and hiker. At some point, I might be an e-biker due to physical limitations.

There's a time and place for everything. Some trails should be hiker only. Some trails should allow mountain biking. And some trails should allow class 1 e-bikes.

Class 2 & Dike should not be allowed on these types of trails. They are more suited for trails that motorized vehicles are allowed (like motorcycles).

I realize this brings more management type issues but it's one that can be handled. The world is getting a little more complex and we must adapt to it.

In the past, the mountain bike community has been responsible to developing and maintaining new & Developing and maintaining new & Developing and I see that trend will continue with all the efforts they continue to do. The funding that comes from these groups could possibly be impacted if ebikes are allowed on ALL trails.

Thank you for allowing mountain bikes to comment on these important matters.
