Comments: I would urge the USFS to leave specific open/closed trail decisions to local field offices and their volunteer partner organizations. I believe that imposing a one size fits all approach to the ebike issue would be a mistake as soil conditions, number of users, types of users ie. walkers vs cyclists, and varied terrain can best be addressed by those most familiar with local conditions.

I urge the USFS to align its rules with those recently instituted by the BLM as locally many of our trails cross land under the jurisdiction of both agencies.
