Comments: As a dedicated mountain biker and trail ambassador I feel that allowing class 1 pedel assist ebikes is one of the best things that has happened to the sport. Yes I realize that it has not been accepted by some old school realms but I am an old school person and wouldn't be able to enjoy the sport with my family and friends without the use of a class 1 Ebike because of my health. There are to many reasons to mention but the bottom line is it is good for rider's and allows people who can't or won't ride to do so and enjoy the outdoors.

Also it certainly will help boost local economy's and business. So far I have not seen that these bikes harm the trails. I say get on board, have rules as mentioned and have fun
