Comments: In regards to allowing eBikes on trails marked multi use I am in favor of doing so for Class 1 bikes. I have been an avid mountain biker for 3 decades, have had heart issues and can no longer ride uphill like I used to. My Class 1 bike full fills my needs and allows me to ride with my sons and grand Children. I think there are many of us out there who ride conservatively and consciously in regards to safety.

I am not in favor of granting access to these trails for throttle twist type bikes or bike with a speed over 20 MPH. This speed is prudent and acceptable on multi use trails. As always individual users can ruin this for others, by excessive speed down hill.

I hope you rule in favor of granting this, or at least allowing local forest regions decide for themselves which trails are allowed.

Morgan
