Comments: The question of e-bikes in national forests is a simple one because the facts concerning e-bikes are simple.

1. Studies have shown no significant impact to trails when comparing ordinary bikes and e-bikes (IMBA).
2. E-bikes are not motor vehicles (15 U.S.C. 2085(b)).
3. E-bikes are the only hope of getting the greater US population to ride bikes.

Therefore, e-bikes, of any class, must be allowed in national forests.

A wilderness without people is a wasteland. An intentional wasteland is a serious moral evil. Make our wilderness useful and enjoyed by all!
