First name: Tom

Last name: Reinhardt

Organization:

Title:

Comments: Class 1 eMTB should NOT be classified as motorized. As pedal assist with no throttle and a maximum speed of 20mph, they essentially run as traditional mountain bikes. Allowing them to be classified as non-motorized bicycles frees their riders to access trails used by other bicyclists, despite physical limitations and health conditions. This is important for their participation in healthy and enjoyable outdoor activities which contribute to physical and mental wellness. Thank you for your consideration. Tom Reinhardt, CEO, Cascade Medical Center, Cascade, Idaho.
