Comments: As a mountain bike rider and former bike shop employee I appreciate being able to ride my bicycle on trails not share with motorized vehicles. With that said as a former bike shop employee I saw an increase of interest in cycling by people who physically had difficulty enjoying outdoor cycling but now see they have the option via electronic mountain bikes. I want them to have as much access to trails as other mountain bike riders and feel safe without the worry of motorized traffic cross their paths. I believe the trails should remain "non-motorized" and that class 1 eMTB should have the same standing as non-motorized bicycles.
