Comments: I am a long standing member of IMBA and a local trail builder. My opinion is to not allow any ebikes on non motorized trails. Our trails are not designed for these electric motorcycles with pedals. there are plenty opportunities for them to ride elsewhere. The only reason The IMBA officials support their use is because the manufacturers pay their way. Its unfortunate that the same company makes a motorized and non motorized product thus creating a dilemma for the imba people. please keep them off all non motorized trails . thanks
