Comments: Thank you for the opportunity for the public to engage on FSM 7700 and 7710, which would revise Forest Service directives to update and clarify guidance on management of electric bicycle (e-bike) use on National Forest System lands.

eMTBs, no matter the classification, should NOT be allowed on non-motorized trails. Many eMTB riders are not capable of controlling their bikes at high speeds and cause trail damage as well as injury to others on the trails.

Reclassify trails as non-motorized for MTBs and motorized for all classes of eMTBs. The next time I have a eMTB crash into me because they are not in control, there will be lawsuits.

An eMTB has a motor so why classify it as non-motorized?
