Title:

Comments: I am a 65 year old individual who has been riding mountain bikes for 25 years. This exercise completes a circle in my life. I would hate to think how life would be without it. I still ride my pedal bike on some of the roughest terrain on the East Coast . My time to be able to enjoy this activity is greatly decreasing. E bikes in the National Forest would allow me to continue my passion for years to come. I fully believe that pedal assist e bikes cause no more damage to the trail system than regular pedal bikes. I also believe that pedal assist bikes give the many more people the opportunity to enjoy the forest in a different way than ever before, therefore exposing more citizens to the beauty and solitude that I extract. Please allow pedal assist only e bikes in the National Forest.
