Comments: Class 1 electric mountain bikes should be allowed on all trails that standard bicycles are allowed on. I have been riding 30 years. I have 4 mountain bikes, 1 of which is electric. I've ridden the ebike 3 years. It's my favorite bike. It rides, handles and reacts just like my regular mountain bike but offers me the ability to not tear up my knees and still enjoy riding after working at an office job all day. They really are JUST BICYCLES. All these nonsense about them being super fast and motorcycles is just outrageous. Frankly anyone who has spent any amount of time on an class 1 e mountain bike doesn't understand why this is even an issue at all!? Placing these bikes on motorized trails is a mistake and dangerous. These are BICYCLES. I can't repeat that enough and they should be allowed on all trails that standard mountainbikes are allowed on.
