Comments: Hello, I currently have an e bike and it allows me to ride my bike around town and on select forest service roads, I have multiple injury's and without the help of an e bike biking would be very hard. As I get better from my surgeries I would like to try some legal trails, and with your help opening up trails to e bike I would be able to explore the area I live in. Thanks for helping us semi handicapped people get out and enjoy all the trails. Thanks for helping make my dreams come true.
