Title:

Comments: In alignment with the IMBA< I would like to thank you for the opportunity for the public to engage on FSM 7700 and 7710, which would revise Forest Service directives to update and clarify guidance on management of electric bicycle (e-bike) use on National Forest System lands.

The mountain bike community is responsible for a large part of the natural surface trail infrastructure that exists today on our federal, state and local public lands. Hundreds of organized mountain bike clubs around the country manage thousands of volunteers who work closely with land managers on trail development, trail maintenance, and trail education for all users. Much of this work relies on funding sources specific to non-motorized trail projects.

The proposed directives could jeopardize this funding and increase user conflict if non-motorized trails were to become reclassified as motorized to allow for eMTBs. Instead, the final directive must reconsider how to allow class 1 eMTBs on select non-motorized trails while retaining a trail's non-motorized status, similar to the recent Department of Interior final rule. The final directive can be further improved by following the International Mountain Bicycling Association's management recommendations: managing the three classes of e-bikes separately from one another, and prohibiting class 2 and class 3 eMTBs on natural surface, non-motorized trails.

Mountain bikers appreciate the leap in technology presented by eMTBs is a unique management challenge. These proposed directives rightfully plan separate management for bicycles and electric bicycles. It is critical that land managers and local mountain bikers work together to determine where eMTBs are and are not appropriate on current and future mountain bike trails.

Thank you for the willingness to engage with the mountain bike community.

I'm an avid mountain biker and occasional e-mountain biker. I especially appreciated the e-MTB option when recovering from an injury and too out of shape to ride my regular bike. I know many people love being able to enjoy the trails even if they don't have the fitness. They are not riding their pedal-assist ebikes to make trouble or be reckless against other users. Their bikes are pedal-assist and should not be considered motorized vehicles. Give them access without jeopardizing the trail access and conditions for the rest of us.

Sincerely,
Beatrice Dormoy
