Comments: e-bikes ruin the environment. I have yet to see an e-biker, ORVer, 4 quad or other motorized vehicle act responsibly. Oh, yes they call in to see if they can ride over another bikes route but it is not really a road. I have seen them out my back yard early in the morning and waking the neighborhoods up. They go faster than the speed limit on public lands and on forest lands. The riders of these motorized vehicles threaten their neighbors unless they can do what they want to do. Then, the land is torn up for hikers, trail bikers, children, parents and their pets to enjoy what God gave us. Then there is the whole bunch of trash they leave in our forests. E-bikes are quiet so and can go 55 mph, when they come up behind hikers, they aren't heard so are trampled over and even killed. Do not allow e bikes on our roads The people the ride them are irresponsible one way or another. They want to drive everywhere so they find an excuse. The forest service and fish and game never see the actual bushes they are requesting to drive through. Withdraw your application NOW.
