Comments: I do not support any kind of e bike on Forest Service. I do not agree bike riders are the be all end all of trail development. They are not inclusive of hikers and equestrian both of whom had a very long history of trail building and maintaining volunteerism long before bikes came around! Bike ruin the wilderness outdoor experience for the rest of us! Do NOT RECLASSIFY non motorized trails to satisfy theses selfish people, They already speed and hurt people and animals and laugh and go on their way. They go along head down and earbuds in and ignore everything! They are environmental destructive! No ebikes anywhere on public lands and no bikes period in wilderness. Don't be bullied!
