Comments: E-bikes are similar to cars, as bikes are vehicles too.

E-bikes will do similar damage to the natural environment as would cars if they were allowed.

If given the go ahead with the E-bikes who is going to police riders to make sure they respect the natural environment and stay on the existing tracks for non E-bikes?

What is the issue with hiking/walking?

Hiking/Walking have been workable in the past. Why not maintain hiking/walking?
