Comments: I would like to see non-motorized trails stay non-motorized. Ebikes present a challenge to all of those on the trail due to the speed at which they travel, and the lack of any audible notification that they are coming. This speed and lack of warning translates to the danger similar to that posed on bi-directional trails that allow downhill traffic that reaches high speed.

Two track fire roads could be an exception if trail etiquette and training is imposed and enforced.
