I am responding to e press of my opinion about E bikes on public lands. I am against that proposal. I feel there is already an abundance of people using our forest service trails and lands as we've witnessed this summer. Hikers, people with dogs or children and regular mountain bikers are using those trails more than I've ever seen . I have lived in GUNNISON COUNTY for 50 years.. If the increase of current usage continues I think any other non motorized vehicles , E bikes , would be a possible danger to the current users. As it is mountain bikes and hikers and those who hike with dogs warrant caution . Any greater numbers of tourists and locals using the public lands , especially bike trails , will be a detriment to the sustainability of our wildlife , plants and other species in our most beautiful Public Lands . When is " enough enough" .?
