Comments: Hello Forest Service,

It has been very helpful to have the comment deadline extended. Thank you for providing us all with more time and opportunity to consume this complex document.

Please extend the deadline to the maximum allowance of 120-days.

The scale of this project warrants a full comment time period. This project will be judged for several decades to come. It would be unfortunate if the narrative including an abbreviated public comment period. Please max out the time allotted so everyone has time to digest this effectively. Will you do this?

If you do not extend it to 120-days, will you be transparent in your decision making as to why you did not? Will there be a section on this website explaining? We are all still learning how this process works. Thank you in advance helping us all understand.
