Comments: I agree with IMBA on their view of eMTBs, but reluctantly. Class 1 eMTBs should be classified along with bicycles for use on non-motorized trails, as long as it does not negatively impact non-motorized bicycles, hikers, or equestrians. I am reluctant because I define non-motorized trails as trails for human powered recreation. Entirely human powered. Not human power assisted. But I'm afraid that if we don't at least approve Class 1, trails that are non-motorized may become re-designated as motorized, which is far worse. Class 2 and Class 3 eMTBs have no place on non-motorized trails.
