Comments: I occasionally ride with people older than me (I am 66) and some of them ride ebikes. It doesn't bother me that they ride them. I generally can't keep up with them on FS roads or trails. I think it is ok that ebikes can be ridden on FS roads. I prefer they stay off of trails as it is causing more erosion on the trails I ride due to heavier use. I would like to see some trails left for only regular mountain bikes. If a trail is designated as no motorized vehicles than ebikes should be excluded. My only justification is my personal preference that I don't get run off of trails by someone riding an ebike much faster than a normal bike.
