Comments: Dear Linda Jackson

I write today in opposition of development of the stibnite goldmine. The impact studies show that this mine would be extremely detrimental to the ecology the economy and the rare intact wild river beauty of the Salmon River. I believe that short term growth is unwise use of public resources and will not ultimately benefit the people and ecosystem of the Salmon. Especially given that this damn is on our public lands I ask that we preserve them, and nurture these lands and rivers for future generations.
