Comments: I am personally opposed to allowing ANY motorized bicycles or motorcycles on NPS and BLM single track trails. I have no problem with them on wide roads that park vehicles travel on.

Part of this is because there are too many scofflaws who flaunt the rules and enforcement is beyond underwhelming. The other part is it will be nearly impossible to differentiate and enforce prohibition against the use of some classes of e-bikes v.s. others. There are many trail "poachers" in many of the parks I ride my horse in who currently ride non-motorized mountain bikes on trails clearly signed as off limits to bicycles. Should say class 1 e-bikes be allowed, it is 100% certain classes 2 and 3 will use those same trails. There are very aggressive cyclists who refuse to follow the rules and it will expand to finding even higher speed cyclists on trails which diminishes the safety of hikers and equestrians whom added together are a much higher percentage of the trail users than cyclists.
