Title:

Comments: Please allow Class 1 e-bikes (no throttle, 20MPH max, 750W max) to use the same trails and give the same access as regular mountain bikes. I am 57 years old and have had a knee replacement. I am not able to ride regular mountain bike trails without assistance. It does not make sense to me that Class 1 e-bikes are in the same category as gas powered dirt bikes. There is simply no comparison. It is like saying a person on a horse is the same as a gas powered dirt bike. A Class 1 e-bike does not go faster or cause more trail wear than a traditional mountain bike. It simply allows more people to enjoy mountain biking as they age or overcome injuries or disabilities. I love mountain biking on forest trails. Please allow me to do this on a Class 1 e-bike so I can continue to enjoy mountain biking now and into my later years.
