Comments: I am 62 years old and have been riding class 1 electric mt. bikes for two years now, several 1000 miles, and I hope to ride ebikes on the same trails I enjoyed mt. bikes of for the last 38 years. I know there are a few mt. bikers that do not like sharing the trails with us, but other than that, I see so few conflicts with other trail users that I believe we ebikers belong on the non-motorized trails. The greatness outweighs badness by so so much. Please consider ebikes non-motorized. It is clear to us ebikers that we should not be confined to motorcycle trails where we do not belong. Thank you for your consideration to right this injustice. -Tom
