Comments: As an avid mountain biker I have seen the growth in popularity of Ebikes. While I do think that they are good for elders and disabled persons I don't believe they are a good fit for NON-motorized trails. People with less experience are traveling at speeds only pro riders are capable of. I have seen numerous injuries and people much to far out in the mountains with dead batteries and in dangerous situations. I believe a handicap permit should be required to ride a e-bike on non motorized trails. After all aren't they powered by MOTORS. let's keep them in OHV parks and they need to pay OHV registration fees.
