Comments: Expansion of e-bike use will further despoil our natural areas. Just because something is popular, gaining in use, and becoming a lucrative business does not mean that we have to allow it to increasingly despoil our public lands. Please reconsider the proposed changes that will increase the use of motorized vehicles in our public lands. Let's keep our public lands as natural as possible because we know that if we don't protect them, they will soon be just as developed as the rest of our country. And their very value as a haven from development will be lost.
