Comments: It is in my opinion that all trails designated for use by traditional bikes (nonmotorized, no battery, etc....) remain for use by traditional bikes. I have seen an increase in trail use by both e-bikes and the 1 wheel skateboard/hoverboard. This has led to damage to the trails, accidents involving the higher speeds of these machines, and a general increase of animosity between the motorized users vs. the other trail users and forest staff. Motorized equipment (e-bikes, hoverboards, etc...) should only use trails where other motorized equipment is allowed (dirt bikes, 4 wheelers, etc...). The increased damage to trails is obvious as well as the increased chance for injury.
