Comments: No ebikes should be allowed on MTB trails. It opens the door to future issues with the precedence that these are on the trail. If you need an ebike to get out into the back country, maybe you shouldn't be there? What happens if it breaks? How will you enforce the issue? Park rangers are already stretched thin, how will they know what is a class 1 or something higher? Will they inspect every bike that comes onto the land? That seems like an impossible task.
