Comments: Please modify current regulations to allow class 1 ebikes on non motorized trail. Class 1 bikes are not motorcycles. He ebike is a further advancement in bicycle technology that has made the biking experience for enjoyable. Please allow us to be able to ride with our friends and family who are older, injured, etc that this new technology has allowed them to come back to riding on single track.

Also please consider the use of ebikes on motorized trail is extremely unsafe. With the significant increase in motorized use of public lands riding a bike on motorized terrain is not safe for the rider or the motorized user.

The ebike is hurting nothing but the egos of the strata crowd, please allow class 1 ebikes on any current and future trails that allows bicycles.

Thanks
