Comments: DO NOT continue with this damaging proposal to allow electric bicycles on trails with hikers and bikers. As an avid hiker in the Tetons and surrounding areas, I value the solitude and unruined surroundings I hike in. I see those e bikes sometimes around town. One can always tell an ebike from a regular bike because they approach much faster than anyone can peddle. There is absolutely no need for these intrusive machines to be in the wilderness. This is not what our public lands were designated for.
