Comments: I am not sure how an e bike is classified as a motor vehicle. Most of the e bikes I have come across only assists the rider not propel them as a motorcycle does. I get having to manage a motorcycle as it has more impact on the trails as in ruts and such but I think that an e bike should be in the same class as a non e bike in that it doesn't have any more impact as a regular bike. We do need regulatory guidance to protect the trails but this is a non issue.
