Comments: As an older biker and a sufferer of asthma for my entire life my class 1 eMTB allows me to enjoy or beautiful state trail system as well as get the exercise I need. (we really do get exercise as well!) My bike can in no way harm the trail system as its an assist. Any ebike w/ a throttle should be banned as these can harm the trail.

Fears that this will hamper donations I feel is unwarranted as I am a regular a donor and I'd hope that my using the technology available to me to enjoy a sport I could not without my ebike would not deter the purists to continue to donate as well.

I also believe if the action is taken to ban class1 eBikes from OUR trail systems could and would result in several civil right law suits brought by many riders like myself w/ disabilities. The eBike allows us to enjoy the trails just like the people who look down on riders like us.
