Comments: In reference to allowing e-bikes on public land, I strongly support class 1 pedal assist e-bikes be allowed on ALL trails that allow mountain biking currently. The class 1 pedal assist bikes do NOT adversely impact the trails or environment any more or any less than an unassisted bike. I own and ride both mountain bikes and class 1 pedal assist e-bikes. The pedal assist class 1 e-bike allows an entire generation of mountain bikes to continue to do what they love as they age into their 50s, 60s, and 70s, off setting physical ailments as we all age. The class 1 pedal assist e-bikes allow for extended exploration of our great trail systems and national parks without requiring exceptional conditioning and fitness levels that are harder and harder to achieve as we age.
