Comments: All eBikes should be classified as they are- motorized recreation. Suggestions by IMBA and other groups to separate out eBikes by classes are self-serving and unenforceable. On national forest lands we already have plenty of trails designated for motorized recreation- on many forests motorized trails already far outnumber non-motorized. I strongly oppose allowing eBikes on any non-motorized trails- it's difficult enough managing standard mountain bikes, horses, and pedestrians as is. It's unfortunate that organizations such as IMBA just have no concern for anyone other than those who choose to recreate on two wheels.
