First name: Steve

Last name: Jones

Organization: Monongahela Outdoor Volunteers

Title:

Comments: I strongly support class 1 eMTBs on selected National Forest trails. These trails should remain classed as non-motorized trails because ATVs and dirt bikes will damage the trails and will be a nuisance to hikers. Class 1 eMTBs require the rider to pedal, so that are not faster than a regular mountain bike, except when going uphill.

Also, class 1 eMTBs are perfect for trail maintenance. I'm 73 yrs old and help to maintain 60 miles of trails in our local National Forest. I can could cover and maintain more mileage using an eMTB.
