Comments: Good Morning,

As a mountain biker, I would like to make sure that the trails that I work and ride on are protected from motorized vehicles. They have their place, we have ours. They should be separate. Please take into account the damage that a motorized bike does to trails when considering what to open up and what to not. These don't mix. A blanket ruling on allowing these into entire sections of forest is going to cause harm and issues with it's users.

Thank you

Kevin
