Comments: I am an avid mountain biker. I use a self powered mountain bike. E-bikes are a serious problem on my local trails. E-bikes go significantly faster than a self powered mountain bike and cause real safety issues on the trails. They are not any different than a motobike, except that they run on a battery instead of gasoline. E-Bikes should only be allowed on motorized forest roads and motorized trails. E-Bikes must not be allowed on non-motorized trails because they have a motor!
