Comments: I would like to say I believe that pedals assist emtb should be allowed anywhere a bike can go, I have both knees replaced and my class 1 emtb is so fun to ride, and I'm 61 years old, my emtb has made it fun to ride again, I can ride with my son now, he would always have to wait on me, and now I can ride and keep with him making riding so much more fun, I believe they don't hurt the trails anymore than regular mtb's, and would open the sport up to so many more people, please allow emtb's on single track trails, anywhere a bike can go, emtb's class 1 should be allowed
