Comments: I have a Trek Power Fly E-Bike for Mountain Biking it keeps me going and enables me to ride trails with medium difficulty that I could never ride before. I am 63 years old and started mountain biking at 60. It is still my pedaling and still my challenge to ride these trails, as I age it is keeping my heart rate and balance in pretty good shape for my age. It has enhanced my life by enabling me to do things I never thought possible with the technology the bike brings. It is wonderful and I am advocating to allow me to ride trails as a tax paying citizen and mountain bike senior.
