Comments: I do not believe any specific designation is required. An eBike is a motorized vehicle, period. Therefore, non-motorized trails (hiking, biking, horses, etc) should NOT allow eBikes regardless of whatever class they might be in. EBikes should be welcome on motorized trails (dirtbike, ATV, roads). I feel that it is pretty clear that an eBike is motorized and the justification that it enables folks to access areas is not sufficient. I believe that non-motorized areas should remain and provided solitude and challenge to those who venture out.
