Comments: I am 61 years old and have been mountain biking since 1992. I love the sport and love being outdoors in the forests. Up until recently, I have used a conventional mountain bike but a heart condition and other physical problems have made it almost impossible to participate in the sport I love so much. This has led me to purchase a class 1 ebike. I can now enjoy the sport I love so much again. I, like most other ebike riders I know, are a bit older and now have trouble riding conventional mountain bikes. We are very responsible and courteous on the trails. There has to be a way to address everyone's concerns and come to a fair and reasonable solution..

Possibly only allowing ebike to ride on forest service trails on weekdays when the trails are not as busy? I hope you will consider my situation as well as many others like myself when you make your decision. Thank you for giving me the opportunity to voice my thoughts.
